PREFACE

This is the fourth edition of the Montana Health Data Book and Medical Facilities Inventory.

The Montana Health Data Book and Medical Facilities Inventory makes available health information and health utilization data. The Data Book and Facilities Inventory is a guide to assist the public and health professionals in the conduct of their work and pursuit of health planning interests.

The extensive nature of health data for Montana makes it impossible to impart all the data in a concise and brief presentation, so in an effort to make this health data accessible, we mention the following agencies and their respective data responsibilities:

1. The Montana Hospital Association: Expenditure data and financial information.

2. Montana Rate Review System: Information on charges for their member hospitals.

3. The Montana Health Systems Agency: The Montana Health Systems Plan.

4. The Montana Foundation for Medical Care: Medicare and Medicaid information--diagnostic and special studies.

5. The Emergency Medical Services Bureau: Information about emergency personnel, ambulances, and training of personnel, etc.

6. Montana Blue Cross: Intermediary for Medicare Cost Reports and financial and revenue information for Montana hospitals, and also information about their subscribers.

7. The Department of Social and Rehabilitation Services: Information about nursing homes and Medicaid information.

8. The Montana Physician Service (Blue Shield): Information about their subscribers.

9. The Department of Administration: (Research and Information Systems Division) Census information.

1982 HOSPITAL REPORTS

1982 HOSPITAL REPORTS

The following pages contain information from the 1982 Annual Survey of Hospitals conducted by the Montana Department of Health and Environmental Sciences with the assistance of the Montana Hospital Association.

The calculated parameters are defined as follows:

$$\text{Percent Occupancy} = \frac{\text{Total Inpatient Days}}{(\text{Licensing List Beds} \times 365)} \times 100 \text{ Percent}$$

$$\text{Possible Bed Days} = \text{Licensing List Beds} \times 365$$

$$\text{Average Daily Census} = \frac{\text{Total Inpatient Days}}{365}$$

$$\text{Average Length of Stay} = \frac{\text{Total Inpatient Days}}{\text{Total Admissions (Inpatient)}}$$

$$\text{Turnover} = \frac{\text{Possible Bed Days} - \text{Total Inpatient Days}}{\text{Total Admissions (Inpatient)}}$$

$$\text{Case Flow} = \frac{\text{Total Admissions (Inpatient)}}{\text{Licensing List Beds}}$$

Notes on Medicare Utilization Summary:

Days and admissions for Silver Bow General in Year 1981 were taken from HCFA Report 2552-81.

All Columbus Hospital - Great Falls data is taken from HCFA 2552 reports. The days are adjusted by the ratio:

$$\frac{\text{HCFA REPORTING PERIOD PATIENT DAYS}}{\text{DHES SURVEY REPORTING PERIOD PATIENT DAYS}}$$

Because of the different reporting periods. The resulting figure for Medicare days is then divided by the reported length-of-stay for Medicare patients found on the HCFA report to obtain an estimate for Medicare admissions.

HOSPITAL HISTORICAL DATA

HOSPITAL HISTORICAL DATA

The following pages contain listing of License List Beds, Reported Set Up and Staffed Beds, Inpatient Days, Admissions, Percent Occupancy, Average Length of Stay, Total Paid Expenses, Adjusted Expense per Inpatient Day, and Adjusted Expense per Admission for Private (non-state or federal) Hospitals in Montana for the years 1978 through 1982. The data was obtained from the Department of Health and Environmental Sciences' Annual Survey of Hospitals. The expense information was provided by the Montana Hospital Association. The formulas used are as follows:

$$\text{Adjusted Expense/Inpatient Day} = \frac{\text{Total Expenses} \times \left(\frac{\text{Gross Inpatient Revenue}}{\text{Total Gross Patient Revenue}} \right)}{\text{Inpatient Days}}$$

$$\text{Adjusted Expense/Admission} = \frac{\text{Total Expenses} \times \left(\frac{\text{Gross Inpatient Revenue}}{\text{Total Gross Patient Revenue}} \right)}{\text{Admissions}}$$

The ratios assume that the ratio of Gross Inpatient Revenue to Total Gross Patient Revenue equals the ratio of Inpatient Expenses to Total Expenses.

Some combination Hospital and Long-Term Care Facilities had years in which some part of the Long-Term Expenses were included in the Total Paid Expenses of the Hospital. All three expense figures are affected. The following facilities have some sort of qualifying statement on their Indicator Reports:

Year	Facility	Comment
1979	Daniels Memorial Nursing Home and Hospital Scobey	Expenses Include LTC
	Garfield County Nursing Home and Hospital Jordan	Expenses Include LTC
	Big Horn County Memorial Nursing Home and Hospital Hardin	Expenses Include LTC
	Mountainview Memorial Nursing Home and Hospital White Sulphur Springs	Expenses Include LTC
	Stillwater Convalescent Center and Community Hospital Columbus	Expenses Include LTC
1980	Garfield County Nursing Home and Hospital Jordan	Expenses Include LTC
1981	Silver Bow General Nursing Home and Hospital Butte	Not Reported by MHA; Calculated by DHES.

1982 HOSPITAL PATIENT ORIGIN SUMMARY

M E M O R A N D U M

TO: Patient Origin Users

SUBJECT: 1982 Patient Origin Study

Enclosed is a preliminary report of data obtained from the Patient Origin Survey included in the 1982 Survey of Montana Hospitals. These data exceptions should be noted:

1. Saint Vincent, Dahl Memorial, Frances Mahon, Central Montana and Missoula Community did not report. The values for these hospitals were obtained by multiplying the 1979 Patient Origin Study discharges by the ratio of 1982 discharges to 1979 discharges and using decimal accumulation to round answers. Hospitals that reported data for two years had their commitment indices tested using chi-square. Few hospitals had shifts in the commitment of the patients discharged (the percentage of a hospital's total discharges that go to a certain area). Therefore, this mode of estimating the missing hospitals seemed reasonable.

2. Poplar Hospital included 97 newborns.

3. Pondera Medical Center included 100 newborns.

4. Bozeman Deaconess has included newborns.

Some of the hospitals reported discharges to the county level. Trying to determine the relevance index (percentage of the total from a geographical area that is discharged from a certain facility) of an area less than the county level is not possible.

1982 LONG-TERM CARE REPORTS

NOTES ON 1982 LONG-TERM CARE SURVEYS

North Valley Health Care, Inc. - Stevensville reported a 186-day period which was extrapolated to 365 days for data.

Butte Convalescent Center - Reported a 211-day period which was extrapolated to 365 days for data.

Four Seasons Nursing Center - Columbus reported a 182-day period which was extrapolated to 365 days for data.

Bozeman Convalescent Center - Reported 182-day period which was extrapolated to 365 days for data.

Livingston Convalescent Center - Patient Origin data is for January 1, 1982 to June 30, 1982. Numbers are extrapolated to a year by multiplying by total admissions/P O total admissions.

1982 LONG-TERM CARE REPORTS

The following pages contain information from the 1982 Annual Survey of Long-Term Care Facilities conducted by the Montana Department of Health and Environmental Sciences.

Expense information in available by contacting the Department of Health and Environmental Sciences, Health Planning Bureau (406) 444-3121.

Due to the nature of the computer software used to produce the LTC Reports, Region totals are listed after the individual facilities in that Region and the State total is at the end of each Report.
